How to Delete An Existing AIC Wireless Profile and Re-Connect using the most up to date method

Android Devices

Overview:

This article will show the user how to delete an existing wireless profile and connect using the most up to date method on most Android / Samsung devices.
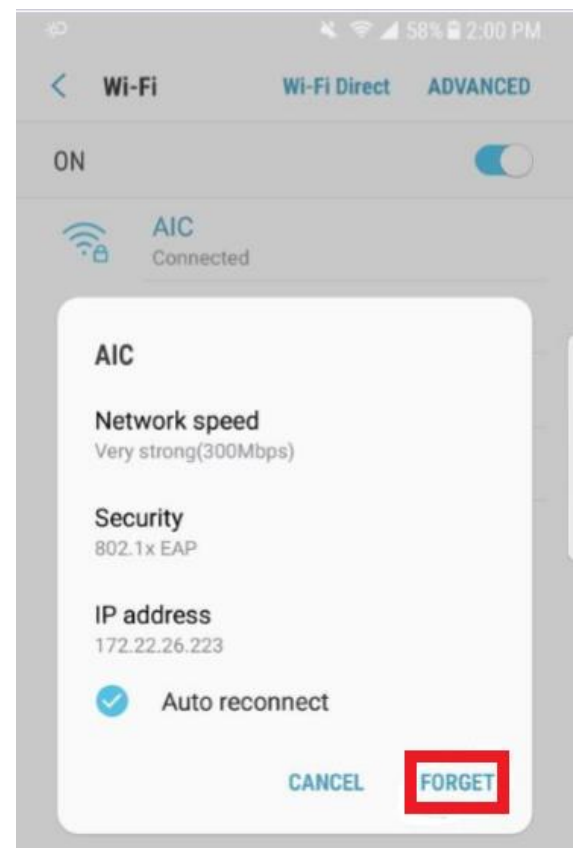

Symptoms:

- **Deleting an existing wireless profile.**
- **Connect wirelessly using the most up to date method.**

Navigate to the Settings Icon

Look for the AIC network then select. A box will come up. Select "Forget". Then go back to the list of wireless networks.

When attempting to reconnect to the AIC network, follow these steps:

1. Under "EAP method", click the drop down and select "PEAP".
2. Under "Phase 2 authentication", click the drop down and select "MSVCHAPV2".
3. Under "Identity", enter user's AIC email.
4. Under "Password", enter the user's AIC password.
5. Lastly, select "CONNECT". The user has successfully connected to the AIC network.
