 Mobile hotspot

 Data usage

 Proxy

Status

Network status

You're connected to the Internet

If you have a limited data plan, you can make this network a metered connection or change other properties.

[Change connection properties](#)

[Show available networks](#)

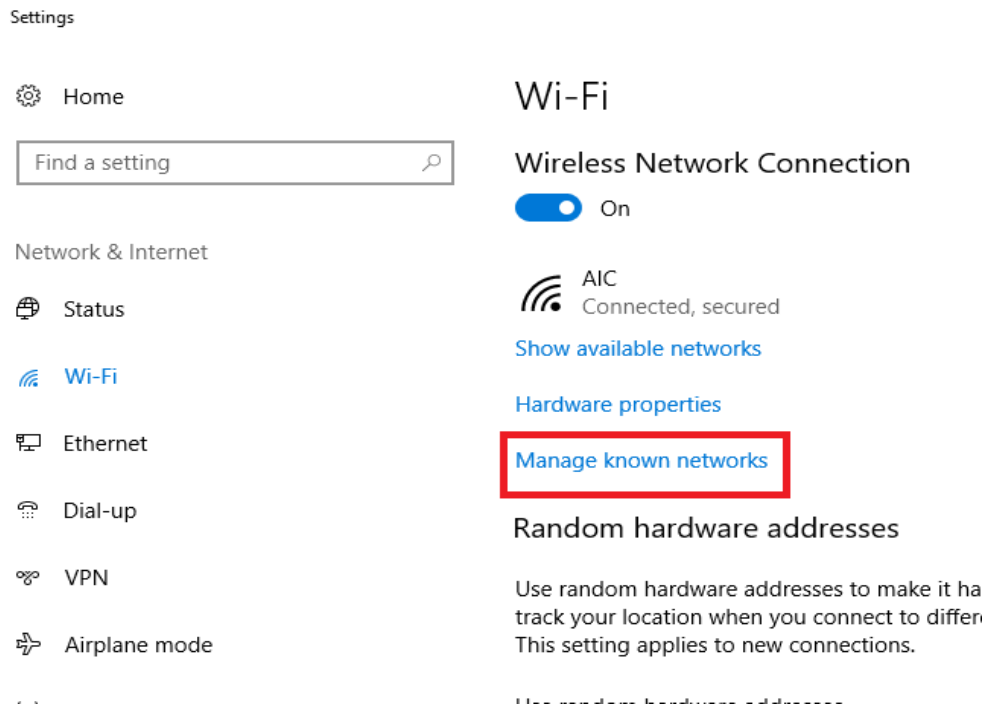

Change your network settings

 **Change adapter options**
View network adapters and change connection settings.

 **Sharing options**
For the networks you connect to, decide what you want to share

 **HomeGroup**
Set up a homegroup to share pictures, music, files, and printers

Under “Wireless Network Connection,” select “Manage known networks.”

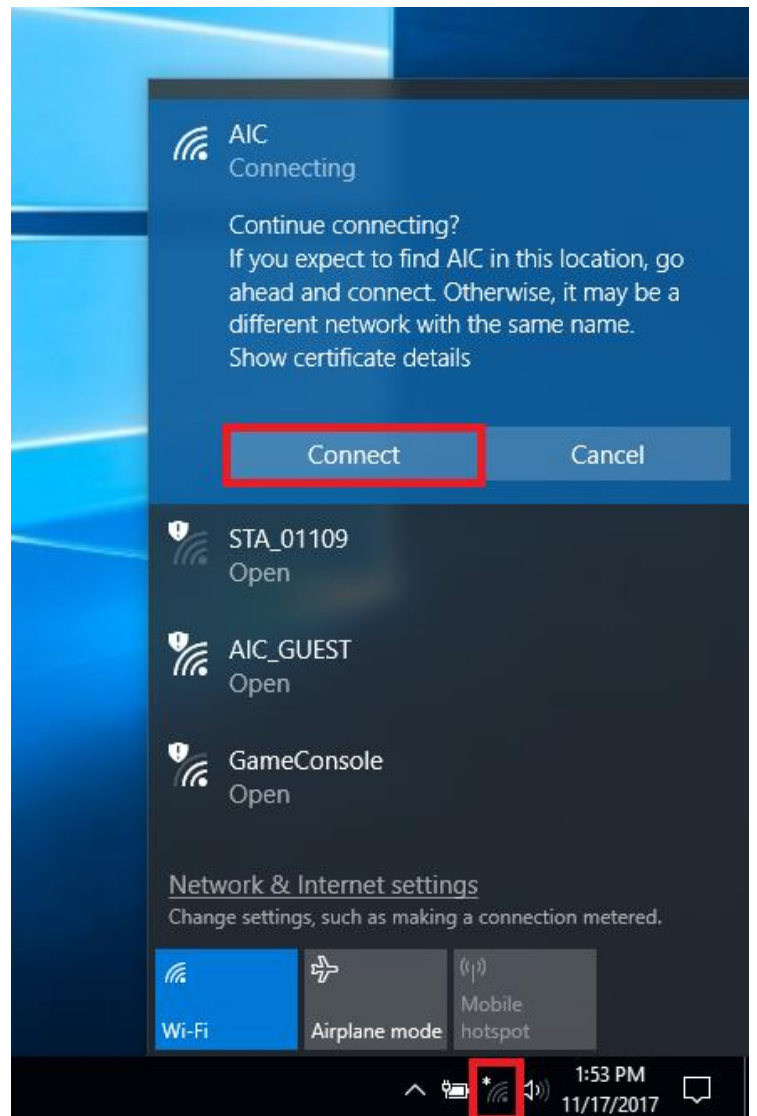

Under “Manage known networks,” the user’s AIC wireless profile is shown below. Click “Forget.” Then exit the settings window.

Part 2

Navigate to the wireless icon located on the task bar and select the “AIC” network. Then select “Connect.” This message indicates that you trust the wireless certificate to connect.

If prompted enter your AIC email address and password.
