

How to Delete An Existing AIC Wireless Profile and Re-Connect using the most up to date method

iPhone / iPad

Overview:

This article will show the user how to delete an existing wireless profile and connect using the most up to date method on an iPhone / iPad

Symptoms:

- Deleting an existing wireless profile.
- Connect wirelessly using the most up to date method.

Part 1

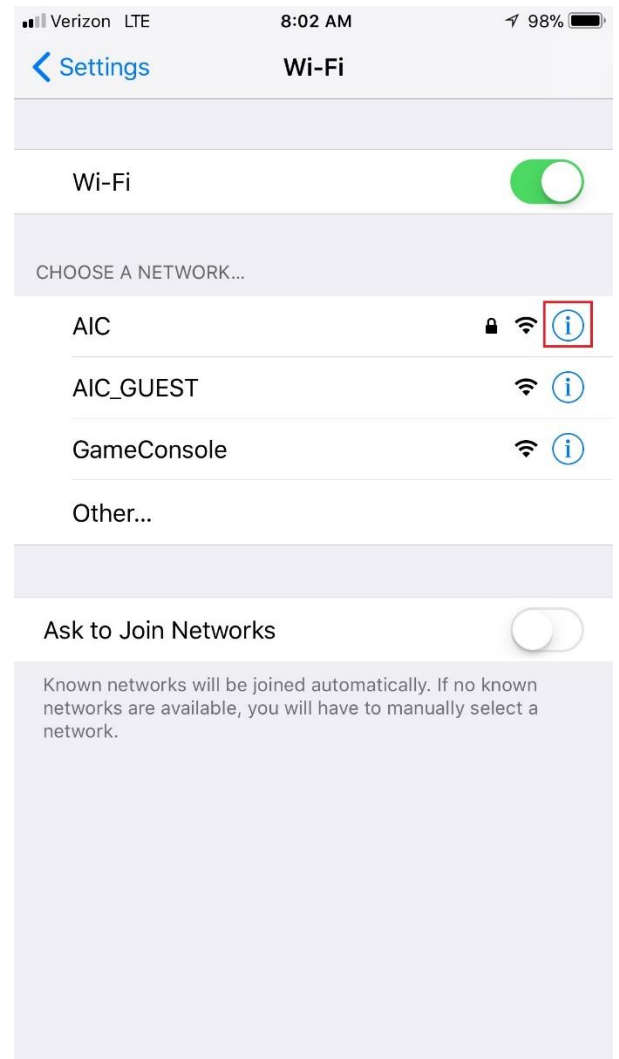

Navigate to the Settings Icon

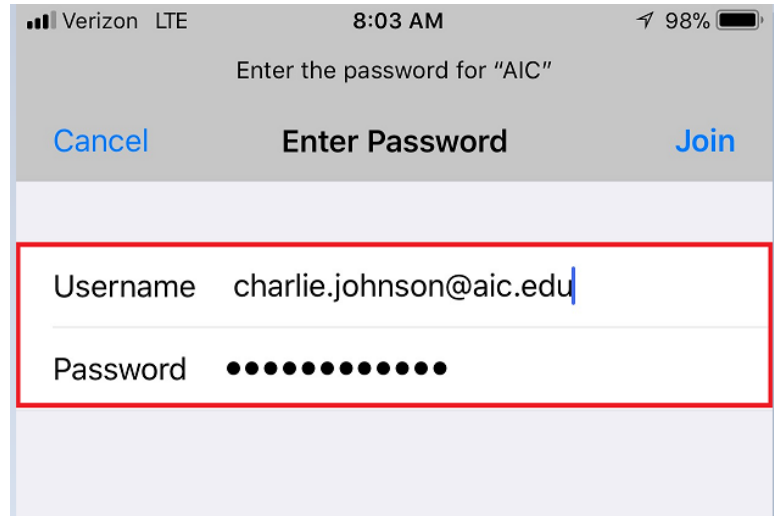

Look for the AIC network. Click the information icon, then select "Forget this network." Then go back to list of wireless networks and select AIC.

Forget This Network

Auto-Join

After selecting the AIC network, enter in the user's AIC email under "Username" and the password under "Password" Then select "Join."

- This message may come up. This message indicates that the user is trusting the wireless certificate to connect. Select "Trust."
- The iPhone / iPad has successfully rejoined wireless network with the most up to date wireless connectivity. Repeat these procedures when password changes take effect.
